What does 100 jellybeans look like? What would 10 X 100 jellybeans look like? How many jelly beans would fit in the back of a pickup? Illustrations are simple but effective.

Write a book listing groups of 50 opposites. This teacher did this with her students, and they called it "The 100 Book" because each page spread has 100 items. You can change the groups (nouns, action words examples, etc.) and/or create it using a computer.

Great math ideas! A good one for older children is how many times can you write your name in 100 seconds? Collect 100 postcards (ask everyone in the school to contribute) and then locate their locations on a map, chart them as to picture (buildings, landscapes, people, etc.)

\$100 Bill <http://www.teacherhelpers.homestead.com/files/100front.jpg>

Here's the idea for this: Cut out Ben Franklin's head and made enough copies for each student. Have them draw a picture of themselves in the middle. Then they should write three things they would buy if they had \$100. You could also use newspaper ads and have your students create a "shopping list" that equals \$100.
